**CLI commands**

## voicecall

`voicecall` is a plugin-provided command. It only appears if the voicecall plugin is installed and enabled.

Primary doc:

Voice-call plugin: [Voice Call](#)

## Common commands

```
openclaw voicecall status --call-id <id>
openclaw voicecall call --to "+15555550123" --message "Hello" --mode notify
openclaw voicecall continue --call-id <id> --message "Any questions?"
openclaw voicecall end --call-id <id>
```

## Exposing webhooks (Tailscale)

```
openclaw voicecall expose --mode serve
openclaw voicecall expose --mode funnel
openclaw voicecall unexpose
```

Security note: only expose the webhook endpoint to networks you trust. Prefer Tailscale Serve over Funnel when possible.
